Name	Type	Required	Default	Description
appletSource	String	Yes		The name of the registered applet.
name	String	Yes		The form variable name for the applet.
height	number	No		The height of the applet, in pixels.
width	number	No		The width of the applet, in pixels.
vSpace	number	No		Space above and below applet, in pixels.
hSpace	number	No		Space on each side of the applet, in pixels.
align	String	No		Alignment
notSupported	String	No		The text to display if a page containing a Java applet-based cfform control is opened by a browser that does not support Java or has Java support disabled.
paramn	String	No		The name of a registered parameter for the applet. Specify a parameter only to override parameter values already defined for the applet in the ColdFusion Administrator.

Example Usage
