Name	Type	Required	Default	Description
name	String	No		A variable name for the data being passed.
type	String	Yes		The transaction type.
value	Any	No		Specifies the value of the URL, FormField, Cookie, File, or CGI variable being passed.
file	String	No		Required for type = "File".
encoded	Boolean	No		Applies to FormField and CGI types; ignored for all other types. Specifies whether to URLEncode the form field or header.
mimetype	String	No		Applies to File type; invalid for all other types. Specifies the MIME media type of the file contents. The content type can include an identifier for the character encoding of the file; for example, text/html; charset=ISO-8859-1 indicates that the file is HTML text in the ISO Latin-1 character encoding.

Example Usage
