## Description

## Category

Other

## Implemented

## Usage Syntax

```
[displayName="String"]  
[extends="String"]  
[hint="String"]  
/>
```

[] = *Optional attribute*

## Attributes

Name	Type	Required	Default	Description
------	------	----------	---------	-------------

displayName	String	No		
-------------	--------	----	--	--

A value to be displayed when using introspection to show a descriptive name for the interface.

extends	String	No		
---------	--------	----	--	--

A comma-delimited list of one or more interfaces that this interface extends. Any CFC that implements an interface must also implement all the functions in the interfaces specified by this property. If an interface extends another interface, and the child interface specifies a function with the same name as one in the parent interface, both functions must have the same attributes; otherwise ColdFusion generates an error.

hint	String	No		
------	--------	----	--	--
