

# cfmailpart

## Description

Indicates a single part of a multi-part e-mail message, specifying the MIME type and (optionally) the character encoding.

## Category

Other

## Implemented

## Usage Syntax

```
type="String"  
[wraptext="number"]  
[charset="String"]  
</>
```

*[] = Optional attribute*

## Attributes

Name	Type	Required	Default	Description
type	String	Yes		The MIME media type of the part
wraptext	number	No		Specifies the maximum line length, in characters of the mail text
charset	String	No		The character encoding in which the part text is encoded

## Example Usage

```
<--- Multi-part message: --->  
from="sender@host"  
to="recipient@host"  
subject="New Site"  
>
```
