

ArrayContainsNoCase

Description

Determines the index of the first array element that contains a specified substring regardless of case.

Category

Array functions

Implemented

Usage Syntax

```
ArrayContains(array, substring)
```

Return Information

Return Type	Return Description
number	Index of the first array element that contains substring, regardless of case. If not found, returns zero.

Arguments

Name	Type	Required	Position	Default	Description
array	array	Yes	1		Name of an array.
substring	string	Yes	2		A string or a variable that contains one. The search is not case-sensitive.

Example Usage

```
fruit = Array("apples", "PeachEs", "oranges", "bananas") >  
ArrayContainsNoCase(fruit, "PEACHES") NEQ 0 >  
#fruit[ArrayContainsNoCase(fruit, "PeACHes")]#
```
