

# arrayDeleteAt

## Description

Deletes an element from an array and resizes the array so that the deleted element doesn't leave a gap.

## Usage Syntax

```
arrayDeleteAt(array array, number position): boolean
```

## Return Information

### Return Type

boolean

## Arguments

The arguments for this function are set. You can not use other arguments except the following ones.

Name	Type	Required	Description
------	------	----------	-------------

array	array	Yes	The array that the element will be deleted from.
-------	-------	-----	--

position number		Yes	The numeric position of the element. Remember that CFML arrays start at 1 not 0.
-----------------	--	-----	--
