Railo & JBoss (AS 5/6) Installation

WAR Installation

- * Download the Railo WAR file
- * Expand it to {jboss.server.deploy}/railo.war

Create a file called jboss-classloading.xml in {railo.war}/WEB-INF/ with this content:

```
xmlns="urn:jboss:classloading:1.0"  
  name="railo.war"  
  domain="DefaultDomain"  
  excluded="org.apache.commons.collections,com.sun.jndi.ldap"  
  top-level-classloader="true"  
  export-all="NON_EMPTY"  
  import-all="true">
```

- * Start jboss
- * Access Railo at <http://{jboss.host}:{jboss.port}/railo/index.cfm>

More information on JBoss classloading: <http://java.dzone.com/articles/jboss-microcontainer-classloading>
