# cfapplet

## Syntax

```
[align="string"]
appletsource="string"
[height="number"]
[hspace="number"]
name="string"
[notsupported="string"]
[paramn="string"]
[vspace="number"]
[width="number"]>
```

*[] = Optional attribute*

## Description

Used in a cfform tag, cfapplet lets you reference custom Java applets that you have registered using the Railo Administrator.

## Body

This tag can't have a body.

## Attributes

The attributes for this tag are fixed. Except for the following attributes no other attributes are allowed.

<b>Name</b>	<b>Type</b>	<b>Required</b>	<b>Description</b>
align	string	No	Alignment
appletsource	string	Yes	The name of the registered applet.
height	number	No	The height of the applet, in pixels.
hspace	number	No	Space on each side of the applet, in pixels.
name	string	Yes	The form variable name for the applet.
notsupported	string	No	The text to display if a page containing a Java applet-based cfform control is opened by a browser that does not support Java or has Java support disabled.
paramn	string	No	The name of a registered parameter for the applet.
vspace	number	No	Space above and below applet, in pixels.
width	number	No	The width of the applet, in pixels.
