cfcase

Syntax

```
[delimiters="string"]  
value="string">  
&
```

[] = Optional attribute

Description

Handle one case of a cfswieth

Body

This tag must have a body.

Attributes

The attributes for this tag are fixed. Except for the following attributes no other attributes are allowed.

Name	Type	Required	Description
------	------	----------	-------------

delimiters	string	No	Specifies the character that separates multiple entries in a list of values. One or more constant values that cfswitch compares to the specified expression case-insensitive comparison. If a value matches the expression, cfswitch executes the code between the cfcase start and end tags.
value	string	Yes	Separate multiple values with a comma or other delimiter, as specified in the delimiters parameter. Duplicate value attributes are not allowed and causes a runtime error.
