cferror

Syntax

```
[exception="string"]  
[mailto="string"]  
template="string"  
type="string">
```

This tag is also supported within cfscrip.

```
error  
[exception="string"]  
[mailto="string"]  
template="string"  
type="string";
```

[] = Optional attribute

Description

Enables the display of customized HTML pages when errors occur. This lets you maintain a consistent look and feel within your application, even when errors occur.

Body

This tag can't have a body.

Attributes

The attributes for this tag are fixed. Except for the following attributes no other attributes are allowed.

Name	Type	Required	Description
exception	string	No	Type of exception. Required if type = "exception" or "monitor".
mailto	string	No	The e-mail address of the administrator to notify of the error. The value is available to your custom error page in the MailTo property of the error object.
template	string	Yes	The relative path to the custom error page.
type	string	Yes	The type of error that the custom error page handles.
