cfheader

Syntax

```
[charset="string"]  
[name="string"]  
[statusCode="number"]  
[statustext="string"]  
[value="string"]>
```

This tag is also supported within cfscript.

```
header  
[charset="string"]  
[name="string"]  
[statusCode="number"]  
[statustext="string"]  
[value="string"];
```

[] = Optional attribute

Description

Generates custom HTTP response headers to return to the client.

Body

This tag can't have a body.

Attributes

The attributes for this tag are fixed. Except for the following attributes no other attributes are allowed.

Name	Type	Required	Description
charset	string	No	The character encoding in which to encode the header value. For more information on character encodings, see: www.w3.org/International/O-charset.html .
name	string	No	A name for the header.
statuscode	number	No	A number that sets the HTTP status code.
statustext	string	No	Text that explains the status code. This attribute is used in conjunction with the statusCode attribute.
value	string	No	A value for the HTTP header. This attribute is used in conjunction with the name attribute.
