

# Not supported tags

The following tags are currently not supported by Railo (\* represents a wildcard):

- cfapplet
- cfgraph
- cfgrid\*
- cftree
- cfformitem
- cfformgroup
- cftextarea
- cfexchange\*
- cfpresent\*
- cfpod
- cfmenu\*
- cfprint
- cfreport\*
- cfsprydataset
- cftooltip
- cfcalendar
- cfpdfform
- cfpdfformparam
- cfpdfsubform
- cfNTauthenticate
- cfspreadsheet (only as extension)

The following tags are supported by Railo, but *differ* in their function from the CFML standards.

- cfapplication
  - The attribute clientstorage does not allow registry as type, but in addition Railo supports file, resource and caches
- cfchart
  - combined charts are not possible yet (although there are extensions available for Highcharts and Flot).
- cfdocument
  - no support for the attributes backgroundvisible, fontembed, scale
- cferror
  - only support type "exception"
- cfform

- no support for the attributes preserveData, archive and codebase
- restricted support for attribute format, only value "html" is supported
- cfinput
  - no support for the attribute validateAt
  - no support for xml and flash controls
- cfinvoke
  - no support for the attributes servicePort and timeout
  - no support for xml and flash controls
- cflogin
  - no support for the attributes idletimout and applicationtoken, cookiedomain
  - no NTLM support
- cfobject
  - no support for corba and ejb
- cfpop
  - no support for the attribute debug
- cfsearch
  - no support for the attributes previousCriteria and suggestion
- cfx
  - only java cfx tags are supported
